

# Maplewood Substation Project Update

October 2024

## To our Valued Neighbors,

As National Grid continues construction at the Maplewood Substation off of Broadway (Route 99) you will continue to see various trucks and equipment entering and exiting the facility. This notification is to let you know there will be an oversized trucks making deliveries at various points over the next few weeks.

Please be aware that there may be temporary traffic impacts as the truck is delivering the equipment.

Safety is always a number one priority and all appropriate safety measures will be in place for members of the public and for the workers at the site while delivering equipment to the site.

Additionally, the work for the 12-foot fence will begin in the next few weeks. You will see crews working to prepare the area along the property boundary and eventually will begin the installation of the fence posts and the fence itself.

If you have any questions or would like further information, please feel free to contact me.

Sincerely,

***Bethany Rocha***
